

# MOHD FARAZ HARMIS

Microsoft Instructor

## EXECUTIVE PROFILE

A seasoned IT professional specializing in the design, implementation, and meticulous administration of Windows-based Corporate Networks across a spectrum of versions. Demonstrates exceptional proficiency in steering and optimizing critical components such as the Active Directory Domain Structure, DNS, DHCP, WSUS, WINS, DFS, File, and Print Server. Leverages the robust capabilities of Saltstack for comprehensive configuration management, complemented by a strong command of Python and PowerShell programming languages, ensuring the seamless operation of complex IT infrastructures.

Renowned for a strategic approach towards planning and executing Domain/User Level Security Access, applying sophisticated server hardening strategies to fortify network defenses. Offers extensive hands-on experience in deploying and managing VERITAS Cluster with VERITAS Storage Foundation, coupled with adeptness in configuring and overseeing Windows clustering. Noteworthy skills extend to crafting intricate and insightful Splunk dashboards, enabling comprehensive monitoring and visualization of network activities, thereby facilitating informed decision-making.

Acknowledged contributions at the virtual center level within VMware have significantly enhanced the efficiency and effectiveness of managing virtualized environments. Known for adeptly navigating and resolving intricate challenges concerning network architecture, security protocols, and clustering methodologies, thereby ensuring the unwavering stability and reliability of corporate IT infrastructures.
