

AAMIR MASOOD

Cloud Architect

EXECUTIVE PROFILE

With 3.10 years of experience as a certified AWS Solution Architect Associate, Aamir Masood is an accomplished AWS Cloud Engineer. His expertise spans AWS services, including EC2, Elastic Load Balancer, AutoScaling, S3, RDS, and more. Aamir is proficient in AWS management tools like CloudWatch, CloudTrail, and Systems Manager. His skills extend to AWS networking concepts, such as VPC and Route 53, and he possesses in-depth knowledge of security and identity/compliance services like IAM, WAF, and GuardDuty.

Aamir is well-versed in cost estimation and operational cost control mechanisms within AWS. He also has hands-on experience with scripting in Python. Furthermore, Aamir has a strong background in cloud security, having worked with tools like Prowler and Scout suite (Opensource CSPM tools), as well as Palo Alto Networks' Prisma Cloud and Cortex XDR.

Aamir's dedication to continuous learning and staying updated with industry trends makes him a valuable asset in the field of cloud engineering and AWS architecture. His comprehensive experience and proficiency in cloud computing, security, and infrastructure design make him a trusted resource for organizations seeking to optimize their cloud environments.
